

PLx Pharma Inc. to Present at Janney Healthcare Conference on September 18

September 10, 2018

HOUSTON, Sept. 10, 2018 (GLOBE NEWSWIRE) -- PLx Pharma Inc. (NASDAQ: PLXP) ("PLx" or the "Company"), a late-stage specialty pharmaceutical company focused on commercializing two patent-protected products, Vazalore™ 325 mg and Vazalore™ 81 mg (referred to together as "Vazalore"™), announced today that Natasha Giordano, President and Chief Executive Officer, and Rita O'Connor, Chief Financial Officer, will present at the Janney Healthcare Conference as follows:

Date: Tuesday, September 18, 2018
Time: 11:35 a.m. Eastern Daylight Time
Location: The Union League Club, NY, NY
Webcast: <https://cc.callinfo.com/registration/#/?meeting=111tejlyh9cax&campaign=1gph83r1k7kyy>

The presentation will be webcast live at the aforementioned time, and archived for 30 days thereafter, via the Company's website at www.plxpharma.com under the News & Events section.

About Vazalore

Vazalore 325 mg is an FDA-approved aspirin product being developed to provide high-risk cardiovascular and stroke patients with more reliable and predictable antiplatelet efficacy as compared to enteric-coated aspirin, while also reducing the adverse gastric events common in an acute setting. PLx is focused on manufacturing, scale-up and label finalization for Vazalore 325 mg aspirin dosage form and preparing an sNDA for Vazalore 81 mg maintenance dose form.

About PLx Pharma Inc.

PLx Pharma Inc. is a late-stage specialty pharmaceutical company focused on developing its clinically validated and patent-protected PLxGuard™ delivery system to provide effective and safe aspirin products. The PLxGuard delivery system works by targeting delivery of active pharmaceutical ingredients (API) to various portions of the gastrointestinal (GI) tract. PLx believes this has the potential to improve the absorption of many drugs currently on the market or in development, and to reduce GI side effects in an acute setting—including erosions, ulcers and bleeding—associated with aspirin and ibuprofen, and potentially other drugs.
